Resin & Wood

Our products are truly unique: they are made of resin and wood : many different shapes and finishes are embedded in resin and can be matched in order to obtain the most interesting look. An exceptionally innovative new collection of wood panels in two distinct ranges - Wood & Resin and Carved Wood. This ensemble of fuses translucent or opaque resins, in a spectrum of colors, with exotic and domestic wood species. Each can be backlit to produce luminescent and spectacular effects. Please note that variations in color and texture may occur due to the nature of the material.

Size

We have a large range of materials. Each product can be personalized and customized with design, color, size and thickness to suit client's needs.

Resin & Wood

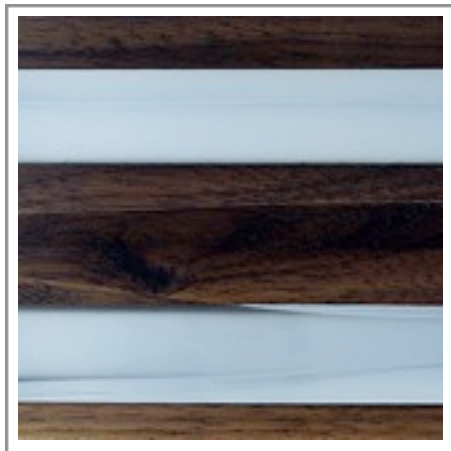

- **Size:**
48" x 102" nominal

Optic Fiber & Wood

This inimitable grouping of Optics Fiber Wood & Carved Wood elevates any design. Blends old-world techniques with the latest in technology, capturing the suggestion of movement through dynamic pattern offerings.

Finishes include ceruse, patina and sandblasted. Illuminated flat panels are rich in character and incorporate a patented process embedding fiber optics in the wood, and are also available perforated. Please note that variations in color and texture may occur due to the nature of the material.

Size

We have a large range of materials.

Each product can be personalized and customized with design, color, size and thickness to suit client's needs.
